**Hugo de Garis**
**What If AI Succeeds?: The Rise of the 21st Century Artificer**
A discussion of rival political and technological scenarios about the rise of the artificial intellect, or "artificer," and its potential impact on global politics.

**William C. Hill**
**The Mind at AI: Horseless Carriage to Clock**
A revealing look at how the intellectual activity we label AI can be likened to five familiar technologies.

**Mark E. Lacy**
**Artificial Laboratories**
An exploration of the way this hypothetical future computing environment would integrate mathematical and statistical tools with AI methods to assist computer modeling and simulation.

**Tim Menzies**
A survey of important AI authors and institutions identifies some problems with using science Citation Indexes to comprehensively study a body of scientific research.

**Randall Davis**
The presentations of Brian Smith and Randall Davis at IJCAI-85 and the concluding panel discussion.

**Usama M. Fayyad, et al.**
**The Fifth International Conference on Machine Learning**
A report on the first open conference on machine learning.

**A. Dale Whittaker & Ronald H. Thieme**
**Integration of Problem Solving Techniques in Agriculture**
A report on the first workshop to explore helping agricultural research by integrating knowledge-based systems technology with conventional problem-solving techniques.

**IJCAI Special Supplement**
Highlights of the Eleventh International Joint Conference on Artificial Intelligence, to be held 20–25 August, Detroit, Michigan, USA.
