

PROJECTS THAT ONLY ARCING MGTOW MONKS CAN DO

Prof. Dr. Hugo de Garis

profhugodegaris@yahoo.com

<https://profhugodegaris.wordpress.com>

In order to make this flyer self-contained, I need to give some definitions, so that the title can be understood.

An ARCer is an “after retirement careerer” i.e. usually someone who has retired in his 60s or 70s, who has good genes and puts in the work to remain highly health conscious, so that he expects to reach 100, i.e. another 3 decades of life, i.e. the third third of life.

A MGTOW monk is a MGTOW (i.e. a man who belongs to the “men going their own way” movement, an important branch of the men’s lib movement) who lives the lifestyle of a monk, i.e. he does not date, has no sex with women, who has no contact with women. His life is womanless.

I’m a MGTOW monk ARCer, one of millions in the western world, who, as ARCers, feel they do not want to waste their final decades with useless pastimes, so undertake a new, substantial career, doing what they love, since they are no longer

wage slaves to an employer, so are free to undertake a new career as their jobby, their job/hobby, and since they are doing what they love doing, they will give that new career, a ton of commitment and mental energy.

Since millions of us are now doing this, this new demographic will have a profound impact on society, as millions of ARCers who have already a lot of experience, both professional and in life, will bring a flood of new ideas, and influence to society.

To illustrate the kind of thing that ARCers do, I'll give myself as a concrete example.

After I've finished annotating a handful of books that I will teach from, I will start to film/video some 120+ YouTube lecture courses in Pure Math, Math Physics and Computer Theory at Ms and PhD levels, so that Ms and PhD level students can teach themselves these subject for FREE. I also make e-libraries, by putting up Google supplied links to full content texts, in these subjects.

The aim is to revolutionize graduate level education in these subjects by making them FREE, so that students I call "alfas" i.e. students with top percentile IQs, can be given access to the materials they need to teach themselves. Since they are alfas, they are smart enough to understand the lectures that I film and give them, and they can read the textbooks whose links I put in my e-libraries, at the click of a mouse, or the touch of a finger on their smart phones, that nearly the whole planet has now.

This ARCing project of mine is a MAJOR commitment of my time and energy, i.e. a whopping 3 decades worth, which is not something a “wager” would even consider undertaking.

I divide the usual lifespan into three main phases, 1) prepping, 2) waging, 3) arcing. Prepping is one’s childhood, youth, and young adulthood, in which one gets an education, to give one the skills and knowledge to be more able to wage effectively, i.e. earn money, a wage, usually as an employee, paid to do some work by an employer, a company, a governmental institution etc.

ARCing is what one does after waging, in the third third of life, which is often similar to waging, except that you are not paid for your work, since you are retired, by definition, and you get to choose what you do, based on what you love to do. Your ARCing is your jobby.

I make the claim, that life is all about ARCing, the main focus of one’s life. Since the ARCing period is at least about a third of life, if one is health conscious, and lives a healthy, long life, making the effort to do the right things to avoid shortening it, e.g. by eating lots of green vegetables and fruit, walking one’s 10,000 steps a day, doing stretching exercises daily, routinely, taking multivitamins, watching one’s weight, so as not to become fat or far worse, obese, as are now 40% of the adult population, who will shorten their life expectancy by a decade or more, etc., then one can say that the first two major phases of one’s life are merely preparations for the third phase, the

ARCing phase, the most rewarding and enriching phase of one's life, that future ARCers really look forward to.

The major attraction of the ARCing phase is that one ARCs doing what one loves, rather than what some employer dictates to you what you must do, since you are working within a contract. The employer pays you to do something, that the employer wants and needs you to do.

If you find the work boring and alienating, that is of no concern to the employer, since he is paying you to do that work. If you work poorly, and take days off, then the employer will feel he is not getting his end of the bargain met by you, and will be motivated to replace you with someone who does a better job for the money the employer pays.

Thus waging, the second phase of one's life, often has an aspect of wage slavery about it, because most people do NOT have jobbies in their waging phase, they feel more enslaved, but also feel they have no choice, since they have to eat and pay the rent, so they know that they have to work.

Once one sees life in three phases, prepping, waging and arcing, then the obvious question arises, as to how many years can one ARC, doing what one loves? The point of this flyer is to state that if you are a MGTOW monk, then you can be an ARCer for many more years than can a manslave to some bloody, parasitic fluffie, who lives off her manslave husband's money and labor.

A MGTOW monk can ARC for many more years than a manslave, for the obvious reason that he is spending his money only on himself, compared to a manslave who pays for a fluffie parasitic wife and her kids, so MGTOW monk can save up faster, and retire earlier in life, years, even decades, earlier, e.g. in his 40s, and spend the rest of his life ARCing, doing what he loves and not what some employing slave master dictates to him what he does.

Now that the hated fluffie feminist hypocrites have taken over the divorce courts, and made them so toxic for men, that in many western countries now, 2/3 of young men wipe their hands of marriage and paternity, choosing to live the MGTOW lifestyle, i.e. they are “men going their own way” i.e. marriage less and childless, preferring to spend their money on themselves, rather than be parasited on by some hated manslaving, immoral, parasitic, fluffie, who expects to be able to live off the money of a man, so she can stay at home in a house that he pays for, raising HER kids.

The fluffie feminists in all their short sighted hypocrisy, are the root cause of the rise and rise of alternative lifestyles for men, as millions of young men reject marriage and paternity, who then look upon ARCing as a very real and viable alternative life style.

If you are a MGTOW monk, then you don't waste any mental energy thinking about how to get your next girlfriend, so that you can penis her. Many MGTOWs do date, because they want the sex, but refuse to marry and have kids, so still have a lot

more money for themselves rather than pay for a fluffie parasite and her kids, which keeps a manslave a manslave for many more years of his life.

In this sense, i.e. the large numbers of years that a fluffie parasites off a manslave, the oppression by women of men is far worse than the oppression of women by men. However, since most feminists know nothing of masculism, they don't see things this way. To monoconscious feminists, i.e. have had only their feminist consciousness raised, i.e. are not biconscious, i.e. they have not had both their feminist and their masculist consciousnesses raised, the masculist claim that women oppress men far more than vice versa, sounds ludicrous, but its true, as can be readily seen, once one has had one's masculist consciousness raised, and one calculates how many years, i.e. how many decades, a fluffie parasite, manslaves a man, her husband.

But, a full MGTOW monk, who not only rejects marriage and paternity, but does not even date, he can do more great things with his ARCing phase of life, than a MGTOW who twaytwefs, i.e. lives the twaytwef (= 2A2F = two apartments, two FIPs) lifestyle with a woman, both of whom are FIPs (financially independent persons) and both have their own apartment, so that when the relationship fails, as most do, then the two of them simply return to their respective apartments, cost free for the man, no alimony, because the ex-girlfriend is a FIP, no divorce, because no marriage, no child support, because no kids, etc.

Twaytweffing forces the woman to be nice to the man, i.e. no nagging, no withholding sex, no manipulation or trying to mold him the way she wants, otherwise he walks away.

But twaytweffing still takes a huge amount of mental energy, because one is interacting with another human being. There is twaytweffing and twaytweffing. For example, a couple might see each other for three evenings a week, mainly for sex and a bit of companionship.

Alternatively, if the man sees his twaytwef partner mostly as a sexual partner, then he could see her only once a week, get the sex, and then spend the rest of the week ARCing, which is hugely less costly in terms of time and mental energy. At least that way, he gets the best of both worlds, the sex and a freeing up of his mind to concentrate on his ARCing jobby.

Since a lot of the years spent ARCing are in the final decades of ones life, there is the lower testosterone factor, i.e. when men get into their 70s, their testosterone levels really drop, so that they become much less “cunt hungry” compared to younger men, so can more easily just give up on women altogether, seeing them as femaliens. That is pretty much my situation now.

I live the lifestyle of a MGTOW monk in practice. I don't date. I tried for six months after arriving in Melbourne, Australia, after having lived half a century in 6 other countries, the previous 12 years being in China. Since I'm a math/physics/computing prof, I'm too bright for the large majority of women, and the few

PhDed women on my e-dating site are mostly monoconscious feminazi arseholes, who hypocritically have the attitude – “How dare you criticize women!” which strikes me as a masculist as utterly hypocritical and contemptible, so I don’t have anything to do with such women, and vice versa.

That situation is not going to change until these monoconscious feminazi bitches become biconscious, by having their masculist consciousness raised, but that’s not going to happen until the broadcast media really takes up the masculist message and spreads it to the masses, including these monoconscious feminazi hypocrites who feel its ok for women, for feminists, to lash out at how men oppress women, but its not ok for men, for masculists, to lash out at how women oppress men, and far worse, because female oppression of men is far deeper and last decades.

Once men go full MGTOW monk, their minds are freed up to concentrate on what they focus their ARCing lives on. In my case its being a globacator, i.e. a global educator, a 30 year massive project, that is not the sort of thing that a younger man would even think of doing, but since I’m in my early 70s, I think of the next 3 decades of my life as merely a third of my life. I know who I am, what I like doing, what my strengths and weaknesses are, because I’ve already lived 70+ years, and have had plenty of time to learn who I am.

Now imagine millions of men living the ARCing lifestyle, spending huge amounts of time and energy doing what they love

doing, and taking their new career very seriously. The social impact of these millions of men, this new demographic, these ARCers, will be enormous. Such men have the luxury to start new careers, in topics that are new to them. I suspect that people become less creative and more intellectually stagnant with age, not because they have become older, but because they feel less challenged, and are bored with what they have been doing for too many years.

I think that when men start ARCing, doing what they love, and are in good health, by bothering to make the effort to remain healthy, then they will have a freshness of mind, that a young person would have who is also tackling a new topic, i.e. what matters, is how new is the topic to the person, whether young or an older ARCer.

With millions of ARCers entering many fields of endeavor, they will impact strongly on those fields, being fresh minds with lots of experience from other fields, thus enrichening these fields.

It is thus to be expected that millions of ARCers will increase the level of creativity in many fields, as these millions of ARCers bring their mature wisdom, and multifield perspective to their new fields, that young people cannot compete with.

Society will become increasingly conscious of these new ARCers, this new demographic of very healthy, health conscious retirees, who take up new careers, with a commitment that only

people who truly love the field, can muster. Their voice will be heard.

Those ARCers who are MGTOW monks will be able to devote more of their mental energy to their ARCing than men who twaytwef, so will be more committed, and achieve a lot more. The MGTOW monk ARCers will therefore be able to do, what twaytwef ARCers cannot, because the latter have less mental energy, they are not as committed as the MGTOW monk ARCers. That is just common sense.

Having a strong focus in one's life as an ARCer is probably an important factor in one's life. If no such focus is there, then many men will just drift and waste their remaining years. Maybe many men are simply incapable of self-focusing like that, and need some employer to tell them what to do with their lives. That may be true.

But for those men, those MGTOW monk ARCers who are capable of self-focusing, they will very probably do great things in the coming decades, since they have both the time and the mental energy to achieve those great things. I expect more to come from these MGTOW monk ARCers than from the twaytwef ARCers, since the latter have their mental energies frittered away by femaliens, who are such attention and male mental energy sponges/parasites, who care more about their own emotional needs than the value to humanity of the achievements of the MGTOW monk ARCers.

For example, imagine if Gustav Mahler had been healthier and did not have a parasitic wife and two kids to pay for, to work for. He could have written more beautiful symphonies, felt more deeply about his music and the ideas behind his symphonies, than he actually did.

A great loss of creativity, and hence, benefits to humanity, coming from male geni, is caused by femaliens, who parasite off the mental energy of these male geni. Such women are truly “culture criminals” in that sense, because they deprive the world of so many products of male cultural and intellectual genius.

Cheers,

Prof. Dr. Hugo de Garis
